

## **Nimsoft to Deliver Critical Monitoring of SAP R/3 to Oracle Enterprise Manager Customers**

Nimsoft is working with Oracle to provide Oracle customers with a software solution for delivering SAP R/3 monitoring and performance data. Under a newly signed cooperative development agreement, Nimsoft and Oracle plan to integrate NimBUS with Oracle Enterprise Manager 10g to provide Oracle Enterprise Manager 10g customers the ability to monitor and manage SAP R/3. The two companies plan to work together to develop and jointly market the NimBUS SAP R/3 Plug In for Oracle Enterprise Manager 10g.

Nimsoft, already a member of the Oracle PartnerNetwork, and Oracle, have already begun the process of product integration. The companies will jointly market NimBUS SAP R/3 Plug-in for Oracle Enterprise Manager 10g, which is projected to be available to customers in Q207.

The NimBUS SAP R/3 Plug-in for Oracle Enterprise Manager 10g will provide multi-instance SAP R/3 monitoring designed to deliver comprehensive, efficient and vital health status information. NimBUS will provide Oracle Enterprise Manager with performance metrics, availability and end-user experience monitoring for SAP R/3 applications. NimBUS provides broad platform support for the myriad of IT configurations that SAP R/3 supports.
